## Subject Index

### A

*Achnatherum hendersonii*; and *Poa secunda*, comparison of growth rates 181

#### aggregation

parasitism and patch size diversity in the coexistence of drosophilid flies 93

seed, effects on the removal rates of elaiosome-bearing seeds by ants 187

#### ant

asymmetric interactions between plants and seed-harvesting ants (Note and Comment) 449

effects of seed aggregation on the removal rates of elaiosome-bearing seeds 187

variations in abiotic defense within myrmecophytic and non-myrmecophytic species of *Macaranga* 1

*Apodemus argenteus*; spatial genetic relationships in 285, (Corrig.) 459

*Artemisia* species; and salt tolerance 241

### B

bear, brown; effects of food distribution on habitat usage 209

*Betula platyphylla* var. *japonica*; associated ectomycorrhizal and endophytic fungi during regeneration 21

binary data; measures of for species occurrence or disease incidence with finite-counts 13

#### bird community

composition patterns in urban parks 373

effects of flooding (Note and Comment) 229

### C

caddisfly; competitive influence on mayflies, mediated by flow rate 145

canopy gap; estimation of size using two photographs taken at different heights 203

caste; development in the Japanese damp-wood termite *Hodotermopsis japonica* 83

#### *Cervus nippon*

kidney and marrow fat indices of deer at Mount Goya (Note and Comment) 453

seasonal food habits in western Honshu 153

*Chenopodium album*; competition with *Daucus carota* 293

cherry; improved growth and water use efficiency in reduced light intensity 385

China; decomposition in a moist evergreen broad-leaved forest in Yunan, China 435

climate change; effect on terrestrial gastropods 73

CO<sub>2</sub> flux; winter flux from soil and snow surfaces 263

#### coexistence

aggregation, parasitism and patch size diversity in drosophilid flies 93

community dynamic models of two dioecious tree species 159

community; composition of bird communities in urban parks 373

#### competition

community dynamic models of two dioecious tree species 159

influence of a grazing caddisfly on mayflies as mediated by flow rate 145

within-patch variation of *Halophila ovalis* in competition with *Thalassia hemprichii* 415

*Daucus carota* and *Chenopodium album* 293

*Cryptomeria japonica*; contribution of root respiration to total soil respiration 323

### D

*Daucus carota*; competition with *Chenopodium album* 293

#### decomposition

in a moist evergreen broad-leaved forest in Yunan, China 435

initial nitrogen content and moisture effects on the decomposition of pine needles 425

#### deer, sika

food habits of in Hokkaido, Japan 345

higher mortality of smaller fawns (Note and Comment) 237

kidney and marrow fat indices of deer at Mount Goya (Note and Comment) 453

seasonal food habits in western Honshu 153

defense, abiotic; variations in within myrmecophytic and non-myrmecophytic species of *Macaranga* 1

defoliation; impacts of dry and hazy weather on a tropical rainforest ecosystem in West Sumatra 63

diet; seasonal food habits of the sika deer in western Honshu 153

#### dioecy

community dynamic models for trees 159

phenology of a common roadside fig in Sarawak 47

dispersal pattern; of Japanese wood mouse *Apodemus argenteus* 285, (Corrig.) 459

distribution, species; relationship to topography in a warm temperate forest 393  
 dormancy; and germination traits of seven *Persicaria* species 33

*Drosophila*; aggregation, patch size diversity and parasitism in coexistence 93

drought; impacts of dry and hazy weather on a tropical rainforest ecosystem in West Sumatra 63

## E

ectomycorrhizas; fungi associated with *Betula platyphylla* var. *japonica* seedlings during regeneration 21

elaiosome; effects of seed aggregation on the removal rates of elaiosome-bearing seeds by ants 187

endophytic fungi; associated with *Betula platyphylla* var. *japonica* seedlings during regeneration 21

ergosterol; use in estimation of mycelial biomass of arbuscular mycorrhizal fungi in *Kummerowia striata* 121

eutrophication; effects of nutrient loadings on an ombrotrophic mire 107

## F

fat; kidney and marrow fat indices of deer at Mount Goya (Note and Comment) 453

fig; phenology of a common roadside fig in Sarawak 47

finite-count correction; measures of spatial heterogeneity for species occurrence or disease incidence 13

fish, marine; patterns and propensities in reproduction and growth (Note and Comment) 101

flooding; effects of on a wetland bird community (Note and Comment) 229

flow rate; mediating the competitive influence of a grazing caddisfly on mayflies 145

food distribution; effects on habitat usage of a female brown bear *Ursus arctos yesoensis* 209

foraging; asymmetric interactions between plants and seed-harvesting ants (Note and Comment) 449

forest; relationship of species characteristics to topography in a warm temperate forest 393

fragmentation; bird community composition patterns in urban parks 373

fruit morphology; seed dispersal and predation by Yakushima macaques 133

fungi

arbuscular mycorrhizal; estimation of mycelial biomass in *Kummerowia striata* by ergosterol analysis 121

associated with *Betula platyphylla* var. *japonica* seedlings during regeneration 21

symbiosis between a termite and a sclerotium-forming fungus 405

## G

gap, canopy; estimation of size using two photographs taken at different heights 203

gastropods, terrestrial; effects of local climate change 73

genetic relationships; of Japanese wood mouse *Apodemus argenteus* 285, (Corrig.) 459

germination

and dormancy traits of seven *Persicaria* species 33

seed dispersal and predation by Yakushima macaques 133

grass; comparison of growth rates in *Achnatherum ben-der-sonii* and *Poa secunda* 181

grey squirrels; effect of on red squirrels 271

growth

comparison of growth rates in *Achnatherum ben-der-sonii* and *Poa secunda* 181

within-patch variation of *Halophila ovalis* in competition with *Thalassia hemprichii* 415

and reproduction of marine fishes, patterns and propensities (Note and Comment) 101

and water use efficiency of cherry saplings in reduced light intensity 385

## H

habitat use

effect of grey squirrels on red squirrels 271

effects of food distribution on a female brown bear *Ursus arctos yesoensis* 209

*Haemaphysalis longicornis*; lack of distributional association with plant surface area (Note and Comment) 357

*Halophila ovalis*; within-patch variation when in competition with *Thalassia hemprichii* 415

herbivory; in adult *Quercus crispula*, effects on seedling survival 219

heterogeneity, spatial; measures of for species occurrence or disease incidence with finite-counts 13

## I

interactions, asymmetric; between plants and seed-harvesting ants (Note and Comment) 449

isozyme analysis; in study of sterility and fertility in *Utricularia australis* f. *australis* 193

## L

leaf litter; decomposition in a moist evergreen broad-leaved forest in Yunan, China 435

light intensity; effect of reduction on growth and water use efficiency of cherry saplings 385  
 litter, leaf; decomposition in a moist evergreen broad-leaved forest in Yunan, China 435

## M

macaques, Yakushima; seed dispersal and predation 133  
 Macaranga; variations in abiotic defense in myrmecophytic and non-myrmecophytic species 1  
 mayfly; and competitive influence of grazing caddisflies, mediated by flow rate 145  
 Mexico; regeneration patterns in mixed oak forests in 249  
 microsatellite analysis; of pollen flow in *Rhododendron metternichii* 263  
 mire, ombrotrophic; effects of nutrient loadings from catchments (Note and Comment) 107  
 mollusk, terrestrial; effects of local climate change 73  
 mortality; higher of sika deer fawns (Note and Comment) 237  
 mutualism  
   phenology of a common roadside fig in Sarawak 47  
   variations in abiotic defense within myrmecophytic and non-myrmecophytic species of *Macaranga* 1  
 mycorrhiza, arbuscular; mycelial biomass of fungi associated with *Kummerowia striata* by ergosterol analysis 121  
 myrmecochory; effects of seed aggregation on the removal rates of elaiosome-bearing seeds by ants 187  
 myrmecophyte; variations in abiotic defense between myrmecophytic and non-myrmecophytic species of *Macaranga* 1

## N

nest location; parasitism strategy of the grey starling *Sturnus cineraceus* 113  
 nitrogen content; and moisture effects on the decomposition of pine needles 425  
 nutrient  
   availability, and competition between *Daucus carota* and *Chenopodium album* 293  
   dynamics, initial nitrogen content and moisture effects on the decomposition of pine needles 425  
   loadings, from catchments, effects on an ombrotrophic mire 107  
   status, kidney and marrow fat indices of sika deer at Mount Goya (Note and Comment) 453  
   value, of sika deer diets 345

## O

oak  
   regeneration of mixed forests in Mexico 249  
   effects of herbivore-bearing adult trees on seedling survival 219  
 oxygen supply; push-up response of stonefly larvae in low-oxygen conditions 175

## P

parasitism, intraspecific; strategy of the grey starling, *Sturnus cineraceus* 113  
 phenology; of a common roadside fig in Sarawak 47  
 photosynthesis; and water-relation traits of summer annual C<sub>4</sub> grasses with contrasting trampling tolerance 165  
 pine; initial nitrogen content and moisture effects on the decomposition of needles 425  
*Poa secunda*; and *Achnatherum bendersonii*, comparison of growth rates 181  
 pollen flow; in *Rhododendron metternichii*, microsatellite analysis of 263  
 pollinator limitation; factors affecting seed-set in *Primula sieboldii* populations 307  
*Primula sieboldii*; seed-set factors affecting 307

## Q

*Quercus crispula*  
   effects of rodent gnawing on seedlings 335  
   effects of herbivore-bearing adult trees on seedling survival 219  
 questing height; of *Haemaphysalis longicornis* and plant surface area (Note and Comment) 357

## R

red squirrels; effect of grey squirrels on 271  
 regeneration  
   fungi associated with *Betula platyphylla* var. *japonica* seedlings during regeneration 21  
   patterns in mixed oak forests in Mexico 249  
 reproduction; and growth of marine fishes, patterns and propensities (Note and Comment) 101  
 respiration  
   soil, winter CO<sub>2</sub> flux from soil and snow surfaces 263  
   root, contribution to soil respiration 323  
 respiratory behavior; push-up response of stonefly larvae in low-oxygen conditions 175  
*Rhododendron metternichii*; microsatellite analysis of pollen flow in 263  
 rodent; effects of gnawing on *Quercus crispula* seedling survival 335  
 root respiration; contribution of to soil respiration 323

# S

- salt tolerance; of *Artemisia* species 241
- Sarawak; phenology of a dioecious fig 47
- sclerotia; symbiosis between a termite and a sclerotium-forming fungus 405
- seed
  - dispersal and predation by Yakushima macaques, *Macaca fuscata yakui* 133
  - bank, soil, seed dormancy/germination traits of *Persicaria* species 33
  - set, factors affecting *Primula sieboldii* populations 307
- seedling
  - effects of rodent gnawing on survival 335
  - effects of herbivore-bearing adult oak trees on survival 219
- sika deer
  - food habits of in Hokkaido, Japan 345
  - higher mortality of smaller fawns (Note and Comment) 237
  - kidney and marrow fat indices of deer at Mount Goya (Note and Comment) 453
  - seasonal food habits in western Honshu 153
- soil respiration
  - contribution of root respiration to 323
  - winter CO<sub>2</sub> flux from soil and snow surfaces 263
- starling, grey; parasitism strategy 113
- sterility; in *Utricularia australis* f. *australis* in Hokkaido 193
- stonefly; push-up response of larvae in low-oxygen conditions 175
- symbiosis; termite and a sclerotium-forming fungus 405

# T

- termite
  - Hodotermopsis japonica* caste developmental system 83
  - symbiosis with a sclerotium-forming fungus 405
- Tbalassia hemprichii*; within-patch variation of *Halophila ovalis* when in competition with 415
- tick; lack of distributional association with plant surface area (Note and Comment) 357
- topography; relationship to species characteristics in a warm temperate forest 393
- trampling tolerance; difference in summer annual C<sub>4</sub> grasses 165
- tropical rainforest; impacts of dry and hazy weather in West Sumatra 63

# U

- Utricularia australis* f. *australis*; sterility and fertility in 193

# W

- water use
  - and growth of cherry saplings in reduced light intensity 385
  - and photosynthesis in summer annual C<sub>4</sub> grasses with contrasting trampling tolerance 165
- West Sumatra; impacts of dry and hazy weather on a tropical rainforest ecosystem 63
- wetland; effects of flooding on a bird community (Note and Comment) 229
